

# Concrete Additive - Anti Foaming Agent

## TECHNICAL DATA SHEET

**Product:** Concrete Additive - Anti Foaming Agent

**Chemical Name:** Emulsion of hydrophobic solids, emulsifiers and foam-destroying polysiloxanes

**CAS-Number:** 63148-53-8.

### General Properties

| PARAMETER                             | Value   |
|---------------------------------------|---|
| Appearance                            | White- light yellow – light pink Milky Emulsion |
| Odor                                  | Characteristic                                  |
| Non-volatile matter, (10 min., 150°C) | 12.5%   |
| Density                               | 1.00 (20°C)                                     |

**Storage:** - Keep container tightly closed in a dry and well-ventilated place.

**Storage period** 12 months from the date of production.

**Application:** Can be used in Chemical Admixtures as Antifoam agent to reduce Air Content and thence improve early compressive strength property, in all aqueous emulsion adhesives and aqueous Industry Coatings

**Disclaimer.** All information to be used as reference only. Final confirmed information will be provided in the sales contract/proforma invoice for specific orders. For safety information please always refer to the latest MSDS or other appropriate information source, concerning the material in question.
